

## ABSTRACT

A disposable absorbent article such as a training pant includes wetness indicating graphics that provide an interactive training aid. The interactive graphics can include a permanent character graphic and one or more active object graphics, which "appear" or "disappear" from view in response to exposure to 5 urine or the environment. Various mechanisms are employed to conceptually and/or visually separate the permanent character graphic from the interactive wetness indicating graphic, such that the character graphic remains independent in the child's mind from the process of toilet training.
